

# BOUNCE BACK FENCE PLANNING AND PREPARATION

The information provided is suggested only. It is up to the individual to ensure they use the correct fencing method suitable for their situation.

Acacia Products will not assume responsibility for design choice by the installer. If unsure it is recommended that the owner of the property seek further advice through an approved Fencing Contractor.

- Use stakes and string lines to mark out proposed area.
- Ensure grass, debris and other vegetation will not interfere with staked and stringed area.
- Look at the topography of the area and flatten fence line as much as possible.
- Mark out gates and ensure they meet the needs of both you and the animal(s).
- Work out how many straining posts are required
- How many intermediate posts are required?
- How many Bounce Back Fence rails will be required? (typically 2-4)
- Calculate how many Bounce Back Vices, Joiners and Brackets are required.
- Have access to auger, shovels and other equipment.
- Be willing to ensure that all posts are sufficient for bracing. Ground conditions must be considered for depth and materials. Not all installations will be standard.
- Think safety first. Use gloves and eye wear. If using large machinery, please be aware of overhead power lines (if applicable to your area).
